NOTES TO THE CONDENSED CONSOLIDATED INTERIM FINANCIAL STATEMENTS (Unaudited)

For the six months ended January 31, 2013 and 2012

(Expressed in Canadian dollars)

1. GENERAL INFORMATION

Intigold Mines Ltd., (“the Company”) is a development stage enterprise that has incurred significant losses to date and currently does not earn revenues. The Company is a junior mineral exploration company currently engaged in the acquisition and exploration of precious metals on mineral properties located in British Columbia, Canada and Peru. Pursuant to the investment agreement with Ttagit Social Networks Inc. dated November 14, 2012, the Company agreed to purchase a 51% interest of Ttagit for an aggregate purchase price of \$800,000. The Company was incorporated under the Canada Business Corporations Act on April 18, 2008, and has continued business under the Business Corporations Act of British Columbia. The Company is listed on the TSX Venture Exchange, having the symbol IGD-V, as a tier 2 mining issuer. The address of the Company’s corporate office and principal base of business is 304 – 700 West Pender Street, Vancouver, British Columbia, Canada.

These condensed consolidated interim financial statements have been prepared on the basis of a going concern, which contemplates the realization of assets and the discharge of liabilities in the normal course of business for the foreseeable future. The Company incurred a net loss of \$671,747 during the six months ended January 31, 2013 and, as of that date the Company’s deficit was \$3,197,715. The Company’s ability to meet its obligations as they fall due and to continue to operate as a going concern is dependent on the continued financial support of the creditors and the shareholders. In the past, the Company has relied on sales of equity securities to meet its cash requirements. There can be no assurance that funding from this or other sources will be sufficient in the future to continue and develop its mineral properties and provide funding to Ttagit Social Networks Inc.

Even if the Company is able to obtain new financing, it may not be on commercially reasonable terms or terms that are acceptable to it. The Company also needs to obtain the support of St. Elias Mines Ltd., in providing extensions to its option agreements, if the Company does not meet any of the conditions of the option agreements. Failure to obtain such financing on a timely basis or extensions on the option agreements could cause the Company to reduce or terminate its operations. The above indicates the existence of a material uncertainty that may cast significant doubt on the Company’s ability to continue as a going concern. These condensed consolidated interim financial statements do not include any adjustments to the recoverability and classification of recorded asset amounts and classification of liabilities that might be necessary should the Company be unable to continue as a going concern.

2. BASIS OF PRESENTATION

The Company prepares its condensed consolidated interim financial statements in accordance with International Financial Reporting Standard (“IFRS”) as issued by the International Accounting Standards Board (“IASB”).

These condensed consolidated interim financial statements have been prepared on a historical cost basis except for financial instruments classified as available for sale which are stated at their fair value. These financial statements are presented in Canadian dollars.

2. BASIS OF PRESENTATION (continued)

2.1 Accounting Standards not yet adopted

The following standards and amendments to existing standards have been published and are mandatory for the Company's annual accounting periods beginning January 1, 2013, or later periods:

IFRS 7 'Financial Instruments: Disclosures' – In December 2010, the IASB amended IFRS 7 requiring additional disclosures on offsetting of financial assets and financial liabilities. This amendment is effective for annual fiscal periods beginning on or after January 1, 2013. Additional disclosures about the initial application of IFRS 9 Financial Instruments are required, effective on the date that IFRS 9 is first applied. The Company is currently evaluating the impact the final standard is expected to have on its financial statements.

IFRS 9 'Financial Instruments: Classification and Measurement' – effective for annual periods beginning on or after January 1, 2013, with early adoption permitted, introduces new requirements for the classification and measurement of financial instruments.

IFRS 10 'Consolidated Financial Statements' – effective for annual periods beginning on or after January 1, 2013, with early adoption permitted, establishes principles for the presentation and preparation of financial statements when an entity controls one or more other entities.

IFRS 12 'Disclosure of Interests in Other Entities' - effective for annual periods beginning on or after January 1, 2013, with early adoption permitted, requires the disclosure of information that enables users of financial statements to evaluate the nature of, and risks associated with its interests in other entities and the effects of those interests on its financial position, financial performance and cash flows.

IFRS 13 'Fair Value Measurement' - effective for annual periods beginning on or after January 1, 2013, with early adoption permitted, provides the guidance on the measurement of fair value and related disclosures through a fair value hierarchy.

Management anticipates that the above standards will be adopted in the Company's financial statements for the period beginning August 1, 2013. The Company has not yet considered the impact of the adoption of these standards.

3. SIGNIFICANT ACCOUNTING POLICIES

The principal accounting policies set out below have been applied consistently to all periods presented in these financial statements, and have been applied consistently by the Company's entities.

3.1 Principles of Consolidation

Subsidiaries

The condensed consolidated interim financial statements comprise the financial statements of the parent company and its subsidiary, Ttagit Social Networks Inc., as at January 31, 2013. Subsidiary is fully consolidated from the date of acquisition, being the date on which the Company obtained control, and continue to be consolidated until the date when such control ceases. All intra-group balances, transactions, unrealised gains and losses resulting from intra-group transactions and dividends are eliminated in full. The net assets and net profit attributable to outside shareholders are presented as amounts attributable

to non-controlling interests in the condensed consolidated interim statements of financial position and condensed consolidated interim statements of comprehensive loss.

3.2 Fixed assets

(i) Cost and Valuation

Fixed assets are carried at cost less accumulated depreciation and any impairment losses. When an asset is disposed of, it is derecognized and the difference between its carrying value and net sales proceeds is recognized as a gain or loss in the statement of operations.

Fixed assets include expenditures incurred on computer hardware, furniture and equipment which are recorded at cost on initial acquisition. Cost includes the purchase price and the directly attributable costs of acquisition or construction required to bring an asset to the location and condition necessary for the asset to be capable of operating in the manner intended by management.

(ii) Depreciation

Furniture and equipment is depreciated over a declining balance basis over the estimated useful life of assets and computer hardware is depreciated on a straight line basis over the life of assets. Where components of an asset have a different useful life and cost that is significant to the total cost of the asset, depreciation is calculated on each separate component. Depreciation methods, useful lives and residual values are reviewed at the end of each year.

Computer hardware	Straight – line method	33%
Furniture and equipment	Declining balance	20% to 30%

3.3 Exploration and Evaluation Assets

Exploration expenditures reflect the capitalised costs related to the initial search for mineral deposits with economic potential or obtaining more information about existing mineral deposits. Exploration expenditures typically include costs associated with acquisition of rights to explore, prospecting, sampling, mapping, diamond drilling and other work involved in searching for ore. Evaluation expenditures reflect costs incurred at exploration projects related to establishing the technical and commercial viability of mineral deposits identified through exploration or acquired through a business combination or asset acquisition. Evaluation expenditures include the cost of:

- i) establishing the volume and grade of deposits through drilling of core samples, trenching and sampling activities in an ore body that is classified as either a mineral resource or a proven and probable reserve,
- ii) determining the optimal methods of extraction and metallurgical and treatment processes,
- iii) studies related to surveying, transportation and infrastructure requirements,
- iv) permitting activities, and

v) economic evaluations to determine whether development of the mineralized material is commercially justified, including scoping, prefeasibility and final feasibility studies.

From time to time, the Company may acquire or dispose of mineral interests pursuant to the terms of option agreements. Due to the fact that options are exercisable entirely at the discretion of the optionee, the amounts payable or receivable are not recorded. Option payments are recorded as resource property costs or recoveries when the payments are made or received. The Company does not accrue the estimated costs of maintaining its interests in good standing.

From time to time the Company may issue shares for option-in agreements in respect of acquisition of mineral interests. These equity-settled share-based payment transactions are measured by reference to the fair value of the entity instruments granted and the corresponding increase in equity.

The Company capitalises its acquisition costs and expenses all of the exploration and evaluation costs.

3.4 Impairment of Non-Financial Assets

Other long-lived assets are reviewed for impairment at each date of the statement of financial position is to determine whether circumstances indicate that the carrying amount may not be recoverable. An impairment test is performed when the impairment indicators demonstrate that the carrying amount may not be recoverable.

An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. The recoverable amount is an asset's fair value less cost to sell and value in use. The estimated future cash flows are discounted to their present value using a pre-tax discount rate that reflects current market assessments of the time value of money and the risks specific to the asset.

3.5 Financial Assets

(i) Classification

The Company classifies its financial assets in the following categories: at fair value through profit or loss, loans and receivables, and available-for-sale. The classification depends on the purpose for which the financial assets were acquired. Management determines the classification of its financial assets at initial recognition.

Loans and receivables

Loans and receivables are non-derivative financial assets with fixed or determinable payments that are not quoted in an active market. They are included in current assets, except for those with maturities of greater than 12 months after the end of the reporting period, which are classified as non-current assets. The Company's loans and receivables comprise cash and cash equivalents and accounts receivable in the statements of financial position.

(ii) Recognition and Measurement

Loans and receivables are recorded at amortised cost using the effective interest method.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

3.5 Financial Assets (continued)

(iii) Impairment of Financial Assets

The Company assesses at the end of each reporting period whether there is objective evidence that a financial asset or group of financial assets is impaired. A financial asset or group of financial assets is impaired and impairment losses are incurred only if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset (a 'loss event') and that loss event (or events) has an impact on the estimated future cash flows of the financial asset or group of financial assets that can be reliably estimated. An impairment loss in respect of a financial asset measured at amortized cost is calculated as the difference between its carrying amount, and the present value of the estimated future cash flows discounted at the original effective interest rate.

3.6 Amounts Receivable

Amounts receivable are amounts due from HST. Amounts receivable are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method, less provision for impairment.

3.7 Cash and Cash Equivalents

Cash and cash equivalents include cash in hand, deposits held at call with banks, other short-term highly liquid investments with original maturities of three months or less.

3.8 Share Capital

Common shares are classified as equity. Incremental costs directly attributable to the issue of common shares and share options are recognized as a deduction from equity, net of any tax effects. Common shares held by the Company are classified as treasury stock and recorded as a reduction to shareholders' equity.

Trade payables are obligations to pay for goods or services that have been acquired in the ordinary course of business from suppliers. Accounts payable are classified as current liabilities if payment is due within one year or less (or in the normal operating cycle of the business if longer). If not, they are presented as non-current liabilities.

Trade payables are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

Due to related parties are amounts due to Directors and Officers of the Company which are incurred in the carrying out their respective duties as Directors and Officers of the Company. Due to related parties are recognised initially at fair value and subsequently measured at amortised cost using the effective interest method.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

3.9 Current and Deferred Income Tax

Income tax expense comprises current and deferred tax. Income tax expense is recognized in the statement of comprehensive loss except to the extent that it relates to items recognized either in other comprehensive loss or directly in equity, in which case it is recognized in other comprehensive income or in equity, respectively. Current tax is the expected tax payable on the taxable income for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Taxes on income in the interim periods are accrued using the tax rate that would be applicable to expected total annual earnings. The tax rate used is the rate that is substantively enacted.

Deferred income tax is recognised, using the liability method, on temporary differences arising between the tax bases of assets and liabilities and their carrying amounts in the financial statements. However, deferred income tax is not accounted for if it arises from initial recognition of an asset or liability in a transaction other than a business combination that at the time of the transaction affects neither accounting nor taxable profit or loss. Deferred income tax is determined using tax rates (and laws) that have been enacted or substantively enacted by the balance sheet date and are expected to apply when the related deferred income tax asset is realised or the deferred income tax liability is settled. A deferred tax asset is recognized to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Additional income taxes that arise from the distribution of dividends are recognized at the same time that the liability to pay the related dividend is recognized.

3.10 Share-Based Payment Transactions

The Company applies the fair value method of accounting for all stock option awards. Under this method the Company recognizes a compensation expense for all stock options awarded to employees, based on the fair value of the options on the date of grant which is determined by using the Black-Scholes option pricing model for stock option awards, and the quoted market value of the shares for restricted share units. The fair value of the options is expensed over the vesting period of the options. No expense is recognized for awards that do not ultimately vest.

All equity shared-based payments are reflected in equity settled employee benefits, until exercised. Upon exercise, shares are issued from treasury and the amount reflected equity settled employee benefits is credited to share capital, adjusted for any consideration paid. Where a grant of options is cancelled or settled during the vesting period, excluding forfeitures when vesting conditions are not satisfied, the Company immediately accounts for the cancellation as an acceleration of vesting and recognises the amount that otherwise would have been recognised for services received over the remainder of the vesting period. Any payment made to the employee on cancellation is accounted for as the repurchase of an equity interest except to the extent the payment exceeds the fair value of the equity instrument granted, measured at the repurchase date. Any such excess is recognised as an expense.

3. SIGNIFICANT ACCOUNTING POLICIES (continued)

3.11 Provisions

A provision is recognized if, as a result of a past event, the Company has a present legal or constructive obligation that can be estimated reliably, and it is probable that an outflow of economic benefits will be required to settle the obligation. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability.

3.12 Rehabilitation and Restoration

Provision is made for rehabilitation and restoration when an obligation is incurred. The provision is recognised as a liability with a corresponding asset recognised in relation to the mine site. At each reporting date the rehabilitation liability is re-measured in line with changes in discount rates, and timing or amount of the costs to be incurred. The provision recognised represents management's best estimate of the present value of the future costs required. Significant estimates and assumptions are made in determining the amount of restoration and rehabilitation provisions. Those estimates and assumptions deal with uncertainties such as: requirements of the relevant legal and regulatory framework; the magnitude of necessary remediation activities and the timing, extent and costs of required restoration and rehabilitation activity. These uncertainties may result in future actual expenditure differing from the amounts currently provided. The provision recognised is periodically reviewed and updated based on the facts and circumstances available at the time. Changes to the estimated future costs for operating sites are recognised in the statement of financial position by adjusting both the restoration and rehabilitation asset and provision. Such changes give rise to a change in future depreciation and financial charges. As at January 31, 2013 and July 31, 2012, the Company had no rehabilitation and restoration costs.

3.13 Earnings per Share

The Company presents basic and diluted earnings per share (EPS) data for its common shares. Basic EPS is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of common shares outstanding during the period. Diluted EPS is determined by adjusting the profit or loss attributable to common shareholders and the weighted average number of common shares outstanding for the effects of all dilutive potential common shares, which comprise warrants and share options granted to employees.

4. CRITICAL ACCOUNTING ESTIMATES AND JUDGEMENTS

The preparation of financial statements in conformity with IFRS requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed at each period end. Revisions to accounting estimates are recognized in the period in which the estimates are revised and in any future periods affected. Significant areas requiring the use of management estimates include assumptions and estimates relating to determining defined proven and probable reserves, value beyond proven and probable reserves, fair values for purposes of purchase price allocations for business acquisitions, asset impairment analysis, valuation of derivative contracts, determination of recoverable metal on leach pads, reclamation obligations, share-based payments and warrants, valuation allowances for deferred income tax assets, the provision for

(e) Share Purchase Options (continued)

On December 1, 2010 the Company issued 400,000 stock options, exercisable at \$0.33 per share until December 1, 2012. The options had a fair value of \$81,696 which has been recognized as stock-based compensation during the year ended July 31, 2011.

On March 30, 2012 the Company issued 400,000 stock options, exercisable at \$0.27 per share until March 30, 2014. The options had a fair value of \$49,920 which has been recognized as stock-based compensation during the year ended July 31, 2012.

On May 8, 2012 the Company issued 1,000,000 stock options, exercisable at \$0.30 per share until May 8, 2014. The options had a fair value of \$212,793 which has been recognized as stock-based compensation during the year ended July 31, 2012.

On May 31, 2012 the Company issued 20,000 stock options, exercisable at \$0.30 per share until May 31, 2014. The options had a fair value of \$2,576 which has been recognized as stock-based compensation during the year ended July 31, 2012.

On August 14, 2012, the Company issued 530,000 stock options to directors, officers, and consultants of the Company, exercisable at \$0.18 per share until August 14, 2014. The options had a fair value of \$77,489 which has been recognized as stock-based compensation during the three months ended October 31, 2012.

On August 15, 2012, the Company issued 240,000 stock options to consultants of the Company, exercisable at \$0.30 per share until August 15, 2014. The options had a fair value of \$38,133 which has been recognized as stock-based compensation during the three months ended October 31, 2012.

The fair value of warrants and stock options has been estimated using the Black-Scholes option pricing model. Assumptions used in the pricing model were as follows:

	2013	2012
Risk-free interest rate	1.17% - 1.25%	1.06% - 1.37%
Annual dividends	-	-
Expected stock price volatility	94.96% - 167.40%	83.5% - 89.37%
Expected life of stock options	2 years	2 years
Expected life of warrants	2 years	2 years

Option pricing models require the use of highly subjective estimates and assumptions including the expected stock price volatility. Change in the underlying assumptions can materially affect the fair value estimates and, therefore, in management's opinion existing models do not necessarily provide reliable measure of the fair value of the Company's stock options.

The weight average remaining contractual life of these outstanding options is 1.35 years. The weighted average grant date fair of these options are \$0.17 per option.

12. CAPITAL MANAGEMENT

The Company's primary objective when managing capital is to maintain sufficient resources and raise funding to support current and long term operating needs. The ability to continue as a going concern is essential to the Company's goal of providing returns for shareholders and other stakeholders. The capital of the Company consists of shareholder's equity. The Company manages its capital and makes adjustments to it, based on the level of funds available to the Company to manage its operations. The Company balances its overall capital through new share issuances or by undertaking other activities as deemed appropriate in the circumstances. The Company is not subject to internally imposed capital requirements. There have been no significant changes in the Company's approach to capital management during the six months ended January 31, 2013 and year ended July 31, 2012. The non-compliance of property option agreements may require the Company to raise additional capital through the issuance of new shares.

13. FINANCIAL INSTRUMENTS***Categories of Financial Assets and Financial Liabilities***

The Company's financial instruments consist of cash and cash equivalents, restricted cash, trade and other receivables, and trade and other payables. For cash and cash equivalents, restricted cash, trade and other receivables, and trade and other payables, carrying value is considered to be a reasonable approximation of fair value due to the short-term nature of these instruments. The fair value of financial instruments at the reporting date was calculated on the basis of available market data.

The Company's financial instruments that are measured at fair value on a recurring basis in periods subsequent to initial recognition and the fair value hierarchy used to measure them are presented in the table below. The Company classifies its other financial assets and other financial liabilities measured at fair value using a fair value hierarchy that reflects the significance of the inputs used in making the measurements. The fair value hierarchy has the following levels:

13. FINANCIAL INSTRUMENTS (continued)*Categories of Financial Assets and Financial Liabilities*

Level 1: Quoted prices (unadjusted) in active markets for identical assets or liabilities;

Level 2: Inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices); and

Level 3: Inputs for the asset or liability that is not based on observable market data (unobservable inputs).

The carrying values of the Company's financial instruments, which are the same as their fair values, are classified into the following categories:

<u>Financial Instrument</u>	<u>Category</u>	<u>January 31, 2013</u>	<u>July 31, 2012</u>
Cash and cash equivalents	Designated held for trading	\$ -	\$547,524
Restricted cash	Designated held for trading	63,500	61,000
HST recoverable, interest receivable	Loans and receivables	170,880	110,466
Bank indebtedness	Other liabilities	11,451	-
Accounts payable and accrued liabilities	Other liabilities	460,659	96,425

The recorded amounts for cash and cash equivalents, accounts receivable, HST recoverable, interest receivable, restricted cash, accounts payable and accrued liabilities approximate their fair value due to their short-term nature.

The Company's carrying value and fair value of cash and cash equivalents under the fair value hierarchy is measured using Level 1 inputs. There are no financial instruments measured using Level 2 or Level 3 inputs.

a) Market risk

The Company does not hold certain marketable securities that will fluctuate in value as a result of trading on global financial markets.

b) Interest rate risk

Included in the loss for the year in these financial statements is investment income on the Company's cash and cash equivalent. The Company does not have any debt obligations which expose it to interest rate risk.
